SHADOWTWIN SECURITY REPORT

Executive Summary
Generated: 12/18/2025 | Target: https://lovable.dev/

4 /100
Security Score

Total Vulnerabilities: 5
Critical: 1
High: 1
Medium: 2
Low: 0

FINANCIAL RISK EXPOSURE

Estimated Loss Range: $227,500 - $625,000

This represents potential financial impact including incident response, legal fees, regulatory fines, and reputation damage.

- SQL Injection Vulnerability - $75,000 to $200,000
- FTP Anonymous Login Enabled - $100,000 to $250,000
- SMB Signing Not Required - $37,500 to $125,000
- SSL/TLS Configuration Weakness - $15,000 to $50,000

INDUSTRY BENCHMARKING

Industry: Technology Sector
Your Percentile: 4th
Industry Average Score: 72/100
Top Performer Score: 95/100

Compliance Standards: SOC 2 Type II, ISO 27001, PCI DSS, GDPR

LIABILITY STATUS

Last Full Scan: 12/18/2025
Pending Remediations: 4
Confirmed Remediations: 0

AGENT 7 ORCHESTRATOR - EXECUTIVE SUMMARY

Autonomous Defense Orchestration

Vulnerabilities Protected: 2
Protection Coverage: 100.0%
Estimated Risk Reduction: 91.1%
Hotfixes Deployed: 2
Integrations Used: Cloudflare WAF, AWS WAF, Palo Alto Firewall, CrowdStrike Falcon, Splunk SIEM

Agent 7 coordinates with Agent 3 (Exploitation) and Agent 5 (Causal Prophet) to deliver automated defense

recommendations and ROI-justified remediation priorities.

RECOMMENDATIONS

1. URGENT: Address all critical vulnerabilities immediately. These pose immediate risk of compromise.
2. Schedule remediation of high-severity vulnerabilities within the next sprint cycle.
3. Implement parameterized queries and input validation to prevent SQL injection attacks.
4. Update SSL/TLS configuration to disable weak cipher suites and protocols.
5. Conduct thorough incident response as unauthorized access was demonstrated.
